Who We Are

Celsis Analytical Services is a cGMP analytical services laboratory that partners with customers to provide cost effective ways to add the technical resources needed to manage workload testing deadlines within their budget constraints.

Laser-like focus on quality. With facilities strategically located in Edison, N.J., St Louis, Mo., and Baltimore, Md., we have a uniform commitment to quality and customer service across our operations. Celsis employees are committed to providing compliant, scientifically sound, and error-free services that contribute to our customers' success. All three laboratories are FDA registered and function under current Good Manufacturing Practices (cGMP) and applicable Good Laboratory Practices (GLP). We have also been successfully audited by regulatory agencies (FDA, EPA, DEA).

Fast, accurate and reliable analysis. Whether you are a global pharmaceutical company or a small start-up entrepreneur, we have experience with the challenges you face. Our employees recognize the importance of excellent service and open communication. This client-focused attitude and the investments we've made in our business (NuGenesis Scientific Data Management System, Philip Crosby Quality Program, etc.) have Celsis poised to serve and grow with our existing and new customers.

Major Markets

Celsis Analytical Services takes pride in the relationships we have with our current customers. Many Fortune 500 companies have already come to rely on us to fulfill their analytical testing and drug development needs. Our active customers include eight of the top ten world-wide pharmaceutical companies, a variety of small to medium-sized pharmaceutical companies, personal care companies, and chemical manufacturers. Customers also include manufacturers, formulators, re-packagers, researchers and distributors in the following industries: Biopharm/Biotech, Specialty Chemical, Medical Device, Drug Repackagers and Distributors, and Veterinary. Over 100 clients

visit us annually for periodic certification and/or audits. We welcome those opportunities and view them as a way to demonstrate our commitment to our customers. Customer suggestions and observations are assessed in light of our current and future capabilities and offer an outstanding opportunity for mutual growth.

Services Offered

We provide a cost effective and broad range of quality control testing and drug development services to our customers, primarily in the United States. Services include comprehensive testing in the areas of:

- Chemical Sciences
- Biological Sciences
- Stability Storage & Testing
- Methods Development & Validation
- ADME-Tox Services
- Preformulation and Formulation Development
