Who We Are

CIRION is a leading provider of customized Central Laboratory services for clinical studies. We offer a complete range of project management and logistical services, a broad portfolio of safety and specialized testing services and assay development & validation services.

We thrive on managing complex projects and offer the personalized attention and dedication you expect. CIRION brings added-value by accelerating your drug development process and reducing the time-to-market for your therapeutic products.

Since 1996, we have consistently proven our ability to manage challenging projects of varying scope and size in selective therapeutic areas, and meeting scientific, logistical and analytical challenges of your clinical studies.

Major Markets

CIRION is strategically located for the cost-efficient management of multinational trials. Our entire organization is focused on providing high quality flexible solutions to the pharmaceutical and biotechnology industries worldwide.
