Who We Are

CPL IS THE LEADER IN MANUFACTURING, packaging and analytical testing of prescription and over-the-counter liquid and semi-solid pharmaceuticals. CPL coordinates and executes projects from small scale clinical batches to commercial manufacturing. All of CPL's operations are FDA and Health Canada inspected and strictly adhere to cGMP practices. CPL views itself as a true partner with customers and builds long-term relationships based on trust and excellence. Our employees' qualifications, expertise and dedication allow CPL to consistently differentiate itself in the areas of quality, service and flexibility.

steam-heated and water-cooled jacketed kettles, and vacuum capabilities.

CPL offers a number of packaging solutions including: nasal sprays, tubes, bottles, jars, sachets, applicators and non-sterile syringes. Capabilities include high speed filling, injection blow-molding and bottle decorating. Secondary packaging includes hospital kits and point-of-purchase and promotional displays.

Innopharm, CPL's analytical facility, provides a comprehensive range of testing for raw materials, bulk and finished goods including chemistry and microbiological testing. Innopharm also offers method development, validation, transfer and stability studies.

Major Markets

CPL SERVES A GLOBAL CUSTOMER BASE from its facilities in the US and Canada. Our customers range from many of the top Fortune 500 pharmaceutical companies to virtual companies. As an approved manufacturer under the MRA between Canada and the European Union and recent EU inspections of our US operations, CPL's clients have access to the EU with minimal regulatory effort. CPL routinely manufactures products destined for international markets.
