Bauer, Ph.D., senior vice president and general manager; Axel Müller, Ph.D., president Siegfried Generics; Michael Bavand, Ph.D., general manager Siegfried Biologics.

## Who We Are

SIEGFRIED IS A GLOBALLY ACTIVE, independent Swiss company. As a supplier and service provider for the worldwide pharmaceutical industry, we concentrate on the development and production of pharmaceutical drug substances and customer-manufactured finished drugs, and offer all related services. We focus on maintaining the highest level of competence, working together with our clients as partners. Our specific know-how in process development, chemical and pharmaceutical production, and managing complex outsourcing projects is used to contribute significantly to the success of our customers.

## Major Markets

SIEGFRIED SELLS ITS PRODUCTS and services to pharmaceutical and biotechnology companies globally. We are organized into three business areas, each with global responsibility:

- **Siegfried Actives** offers custom development/manufacturing services and also manufactures branded and generic APIs, including opiates and other controlled substances.
- **Siegfried Generics** offers finished dosage forms and dossiers to the generic pharmaceutical industry.
- **Siegfried Biologics** offers a full line of pharmaceutical services to emerging pharmaceutical and biotech companies.

## Services Offered

EACH OF SIEGFRIED'S MULTI-PURPOSE facilities is equipped with glass-lined, stainless steel and hastelloy reactors ranging in size from 800 to 7,000 liters. The combined facilities have total reactor volume in excess of 500 m<sup>3</sup> and annual output of 1,500 metric tons of finished products. Each of the versatile facilities can operate its reactors over a wide temperature range (-50 °C to 250 °C) and process products in modern centrifuges, pressure filters, and membrane filter presses. New state-of-the-art milling and blending facilities, an isolated dryer building, R&D laboratories, and a new state-of-the-art cGMP process research and development building have recently been constructed.

Siegfried has two manufacturing multi-purpose cGMP sites: Zofingen, Switzerland and Pennsville, New Jersey (USA). We strive to comply with quality, environmental and safety standards. This year, the FDA inspected our facilities in Zofingen and Pennsville and issued "No Action Indicated (NAI)" for each, giving our company the best possible compliance rating.
