Vital Statistics

Year Founded: 1979

Number of Employees: 1,200

Key Personnel: Ludo Reynders, Ph.D., President and Chief Executive Officer; Scott Neilson, Chief Operating Officer; Andreas Dreps, Ph.D., Sr. Vice President Late Phase Clinical Services, Ron Norton, Ph.D., Sr. Vice President Exploratory Development and Lee Karras, Sr. Vice President Pharmaceutical Services.

Who We Are

We are a global drug development company providing services that span the entire drug development continuum. Our customers range from virtual biotechnology companies to large Pharma and include some of the most notable Pharmaceutical, Biotechnology, and Medical Device companies worldwide. We provide the resources, infrastructure, and expertise to produce, develop, and ultimately register new drug product candidates and support their entry into the market.

Services Offered

Pharmaceutical Development

In our Pharmaceutical Development division, we have expertise in formulation, manufacturing and analytical chemistry with capabilities that include both small molecule and biopharmaceuticals. Our product development know-how enables our customers to bring a pharmaceutically elegant, stable dosage form forward to begin toxicology and subsequent clinical testing.

- Sterile & Solid Dose Manufacturing
- Clinical Packaging & Distribution
- Oral Drug Delivery Technologies
- Formulation Development
- Analytical & Stability Services
- Microbiology Services

Early Clinical Development

In our Early Clinical Development division, we consult with our customers seeking to understand the activity profile of their drug product candidates. Equipped with state of the art facilities, exceptional bioanalytical capabilities, and extensive experience in many different therapeutic areas, molecules and methods, we evaluate the clinical pharmacology, safety, and activity of product candidates in our Phase I clinics.

- US and EU Phase I Sites and Bioanalytical Locations
- Phase I-IIA Clinical Pharmacology
- BA/BE Studies
- Special Populations Available
- Pharmacokinetic and PK/PD Analysis
- Bioanalytical Services: Small and Large Molecule Capabilities
- Full Services: Data Management, Biostatistics, Medical Writing and Regulatory Support

Clinical Development

Leading pharmaceutical and biotech companies rely on us to provide global clinical development programs incorporating the project management, data, analytical and regulatory services required to successfully navigate the drug development process. Our dedicated, full-service clinical development team will support you from your pivotal clinical trials through registration and beyond with our pharmacovigilance and safety services.

- Phase I-IV Clinical Trials
- Global Capabilities
- Project Management
- Clinical Monitoring
- Data Management
- Biostatistics
- Medical Affairs and Safety
- Pharmacovigilance
- Medical and Scientific Writing
