Who We Are

ESTABLISHED 1987, BOSTON ANALYTICAL offers a complete line of cGMP compliant Analytical and Microbiological testing services. We are committed to providing the highest quality testing services to companies in support of their Drug Applications, Release and Stability testing requirements. Personal communications, quality service, competitive pricing and rapid turn-around are the cornerstones of our business. Core capabilities include Product Release and Stability Testing, Method Development/Method Validation, Dissolution, HPLC-GC, Microbial Enumeration, Preservative Effectiveness, Water Testing, Cleaning Validations, Sterility, Endotoxin and Species Level Microbial Identifications performed via MicroSeq®. All work is audited 100% for adherence to SOP's, cGMP's and Specific Client Requirements.

Services Offered

Analytical / Microbiology Services

- Method Development / Validation
- Stability Studies and Storage
- HPLC / GC

- Product Release Testing
- Dissolution Testing
- Antimicrobial Effectiveness Testing USP <51>
- Microbial Limits USP <61>, <62>
- Microbial Identifications via MicroSeq® Comparative DNA Sequencing Technology
- Sterility Testing USP <71>
Class 100 Glove Box with VHP
Millipore Steritest® System
- Environmental Monitoring
- LAL Endotoxin Testing USP <85>
- USP Water Testing
- Cleaning Validations
