- cGMP manufacturing including fermentation, purification, formulation, and filling
- labeling and packaging
- QC testing
- Stability studies
- Regulatory support

## Who We Are

CANGENE CORPORATION IS A biopharmaceutical company with over 15 years of experience manufacturing products under cGMP. Cangene operates two commercial facilities in Winnipeg, Manitoba. The first is an FDA-licensed purification and filling facility for parenterals and the second is an FDA-inspected fermentation facility with the capability to manufacture microbial-derived products up to the kilogram scale. Cangene's Contract Manufacturing Group has developed a successful track record by applying its technical expertise and first-class facilities to add value to our customer's projects. Cangene has experience with a variety of products including plasma-derived and recombinant proteins, antisense oligonucleotides, plasmid DNA and liposome-based products. Cangene's manufacturing capacity is strengthened by its subsidiary, Chesapeake Biological Labs, which operates an FDA-licensed facility in Baltimore, MD. The Cangene/CBL partnership provides a full range of cGMP biologic manufacturing services from fermentation to finished product vial.

## Major Markets

CANGENE PROVIDES manufacturing services to pharmaceutical and biopharmaceutical customers in Canada, United States, Europe and Japan.

## www.cangene.com

The screenshot shows the Cangene website with a navigation bar at the top containing icons for 'HOME', 'ABOUT US', 'CONTACT US', 'SERVICES', and 'PRODUCTS'. Below the navigation is a large image of a woman holding a baby. To the right of the image are three icons: a question mark, a line graph, and a pill bottle. Below these are three more icons: a person working at a desk, a person running, and a person standing. The main content area is titled 'FOCUSED ON CORE STRENGTHS' and lists three key areas: 'Manufacture & Development', 'Contract Manufacturing', and 'Research & Development'. Each area has a brief description and a small image.
