Who We Are

CIRION IS A LEADING PROVIDER of Central Laboratory and Assay Development & Validation services and is well equipped to test drug candidates to accelerate clinical trials. The company offers a complete range of project management and logistical services, a broad portfolio of safety and specialized assays, including biomarker assays. CIRION has 12 years experience in developing assays and writing GLP procedures acceptable to regulatory agencies. The company is accredited by the College of American Pathologists (CAP) and the Centers for Disease Control (CDC).

Our mission is to provide unsurpassed excellence through our state-of-the-art Central Laboratory and services enhanced by the scientific capabilities and know-how of a highly skilled research laboratory team. Our expertly trained scientists work in an environment supported by high-tech computerized management systems and laboratory equipment.

Our team is committed to quality assurance exceeding industry standards to ensure reliable results and uncompromised service.

Major Markets

CIRION IS STRATEGICALLY LOCATED for the cost-efficient management of multinational trials. Our entire organization is focused on providing high quality flexible solutions to the pharmaceutical and biotechnology industries worldwide.
