Who We Are

COATING PLACE, INC. IS A WORLDWIDE leading provider of drug delivery systems, formulation development and contract manufacturing services.

CPI specializes in the Wurster fluid bed micro-encapsulation of powders, granules, beads, tablets and capsules. We provide, formulation development, technology transfer, scale-up and commercial manufacturing in a GMP environment with full analytical support. Our facility processes solvent, aqueous, and hot melt formulations.

Our original management, with more than 30 years of Wurster coating experience remains active in the development of formulations and new technology. Our production staff includes numerous employees with more than 20 years of coating experience. This combination of factors is responsible for the rapid growth that we have experienced in recent years.

Major Markets

COATING PLACE PROVIDES Wurster coating and other manufacturing needs to the following markets:

- Rx, Branded and Generic
- OTC
- Controlled Substance (Schedule II - V)

Services Offered

SERVICES INCLUDE FORMULATION DEVELOPMENT, feasibility, technology transfer, scale-up, process validation and commercial manufacturing with full analytical laboratory support. Other services offered include extrusion spherulization, roller compaction, cryogenic milling, tablet compression, capsule filling and pan coating for R&D, clinical and commercial manufacturing. Coating capabilities include, tablets, softgels and hard shell capsules. The facility has organic solvent capabilities that allow formulations to be developed in both solvent and aqueous coating processes. Development applications include controlled oral delivery such as enteric, delayed release, sustained release, taste masking.

Facilities

Our 185,000ft² facility is located in Verona, Wisconsin, USA. Production suites are equipped with a wide range of Wurster fluid bed coating units that will accommodate batch sizes ranging from 0.010 to over 600kg. This newly expanded facility includes additional commercial scale Wurster units, capsule filling, blending and other new processes. Coating Place is The Place for all your manufacturing service needs.
