Who We Are

CPL is the leader in manufacturing, packaging and analytical testing of prescription and over-the-counter liquid and semi-solid pharmaceuticals. CPL coordinates and executes projects from small scale batches to commercial manufacturing. All of CPL's operations are FDA and Health Canada inspected and strictly adhere to cGMP practices. CPL views itself as a true partner with our customers and builds long-term relationships based on trust and excellence. Our employees' qualifications, expertise and dedication allow CPL to consistently differentiate itself in the areas of quality, service and flexibility.

Services Offered

CPL offers custom manufacturing, packaging and analytical testing of liquid and semi-solid products including solutions, suspensions, lotions, gels, emulsions, creams, ointments, and pastes. CPL's product mix is approximately 50% prescription and 50% over-the-counter.

The Mississauga, ON and Buffalo, NY facilities are 140,000 sq. ft. and 450,000 sq. ft., respectively. Manufacturing capabilities include: state-of-the-art pilot facilities, explosion-proof

suites, containment areas for controlled substances, steam-heated and water-cooled jacketed kettles, and vacuum capabilities.

CPL offers a number of packaging solutions including: airless filling, nasal sprays, tubes, bottles, jars, sachets, applicators and non-sterile syringes. Capabilities also include injection blow-molding and bottle decorating. Secondary packaging includes hospital kits, point-of-purchase and promotional displays.

Innopharm, CPL's analytical facility, provides a comprehensive range of testing for raw materials, bulk and finished goods including chemistry and microbiological testing. Innopharm also offers method development, validation and transfer as well as stability studies.

Major Markets

CPL serves a global customer base from its facilities in the United States and Canada. Our customers range from many of the top Fortune 500 pharmaceutical companies to virtual companies. As an approved manufacturer under the MRA between Canada and the EU and recent MHRA inspections of our U.S. operations, CPL's clients have access to the European Union with minimal regulatory effort. CPL routinely manufactures products destined for international markets from both sites.
