Who We Are

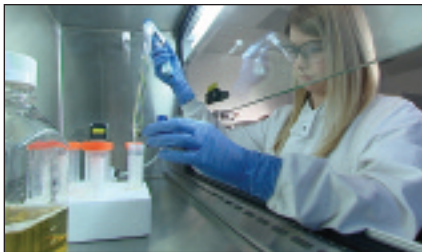

EDEN BIODESIGN IS A SUCCESSFUL international biopharmaceutical development and manufacturing services business that designs, develops, and delivers biopharmaceutical medicines. We are an expert provider of strategic consultancy, process development, clinical trial cGMP manufacturing, and analytical development services for every significant biopharmaceutical product technology.

We operate a state-of-the-art 43,000 sq. ft.² facility in Liverpool, UK providing a range of dedicated process development and segregated cGMP suites for rapid, flexible and robust manufacturing: mammalian, microbial and live-virus products – suitable for all stages of biopharmaceutical development.

Building on our strong track record and recent growth of our UK cGMP facility, we are expanding into the North American market.

Major Markets

EDEN BIODESIGN PROVIDES contract process development services, cGMP manufacturing and consulting support to companies

ranging from entrepreneurial biotechnology companies to major pharmaceutical corporations on all five continents. We specialize in accelerating clinical development of biopharmaceuticals and biologic vaccines based on our considerable expertise and long experience in international markets.

Services Offered

- Analytical Methods Development
- Assay Development
- Biologics Manufacturing
- Biologics Process Development
- Cell Line Construction & Development
- Clinical Supply Management
- Clinical Trials, Phase I & Phase II
- Consulting, Regulatory
- Contract Manufacturing
