Who We Are

UNCOMPROMISING QUALITY, insistence on the highest standards, and a special relationship with the healthcare community endure today as pillars of Fleming’s heritage. Specializing in the discovery, development, and manufacture of innovative prescription and over-the-counter (OTC) therapies, Fleming Pharmaceuticals is the proud maker of CaloMist®, Magonate®, Nephrocaps®, the OCEAN® family of products, ThyroShield® and more.

Based in the greater St. Louis area, the privately-held Fleming Pharmaceuticals facility houses state-of-the-art liquid, semi-solid and solid pharmaceutical manufacturing and packaging equipment, analytical microbiological laboratories, research and development, distribution, sales and marketing, and business administration functions.

Fleming’s development strategy emphasizes growing market segments in strategically selected disease areas. Timely decision making and allocation of appropriate resources make Fleming an ideal partner for collaborations on product development and commercialization.

Major Markets

ESTABLISHED IN 1960, the company has developed products for a variety of clinical conditions related to allergies, cough and cold, nutritional deficiencies, and disorders of the skin. Fleming also manufactures and develops products for other companies focused on topicals, liquids and nasal sprays.

Services Offered

FLEMING PHARMACEUTICALS has an established history of providing expertise in liquid and semi-solid product manufacturing. Special care is taken to ensure all equipment and processes are performing to specifications, while providing full regulatory compliance for our clients. As an FDA registered facility, we follow the strictest guidelines and perform rigorous testing.

Fleming Pharmaceuticals offers fast and efficient formulation and drug delivery research and development services. Our unique approach and agility supports customer requirements for short-term studies as well as large-volume, ongoing projects. Fleming provides a wide range of services from development through commercialization to provide the kind of support needed to speed products to market and maximize profits throughout the product lifecycle.
