## Vital Statistics

**Year Founded:** 1996

**Number of Employees:** 100

**Key Personnel:** Brian R. Hausner, president; Jeff Gutkind, manager, business development, U.S.; Araud Bathelier, manager, business development, Europe; Kenneth C. Haldeman, director of project management, U.S.; Chris Karayiannis, director of project management, UK; Jean Martin Larran, vice president commercial operations.

## Who We Are

MICRON TECHNOLOGIES OFFERS contract particle size reduction and analytical services exclusively for the pharmaceutical industry. With two modern, directly compatible facilities in the UK and U.S., Micron Technologies provides a truly global capability. Primary capabilities involve micronization, in addition to other particle reduction techniques. Processing takes place in segregated, independent processing suites, within a climate-controlled environment. Micron can now process potent compounds (OEL under 1ug) in a custom designed isolator system. In addition, we have the ability to process gram-to-ton quantities with high yields. Our analytical laboratory provides extensive material characterization testing, including particle size analysis (wet/dry), DSC, specific surface area, x-ray diffraction and method development/validation. Additional analytical capabilities include HPLC, FT-IR, Karl Fischer, stability studies and video microscopy.

## Services Offered

AN INDEPENDENT QUALITY ASSURANCE group assures the highest level of compliance. Quality Assurance is responsible for all documentation creation and review, internal audits, external audits, training and release of batches. MTI's 100% cleaning verification program is also managed and maintained by the QA group. Facilities are FDA, MHRA, EMEA and PMdA inspected, with an average of four client audits a month. Along with sister company Colorcon, our goal is to be the benchmark in service and products for the pharmaceutical industry.

**Global Leaders in Pharmaceutical Outsourcing**  
 Micron Technologies is a highly innovative provider of particle reduction, engineering and analytical services. Our clients are the industry's leading pharmaceutical manufacturers. We are a global leader in providing a wide range of services to our clients. Our facilities are FDA, MHRA, EMEA and PMdA inspected. We have a proven track record of successful projects and a commitment to excellence in service and products.
