Who We Are

A RECOGNIZED LEADER IN contract pharmaceutical manufacturing, Mikart specializes in the development, manufacturing and packaging of solid dose and liquid products. Our new 40,000 sq. ft. Science Center provides state-of-the-art development and analytical services. Manufacturing capabilities include fluid bed granulating, roller compacting and high shear granulating. With more than 140,000 sq. ft. of development and production facilities in Atlanta, Georgia, Mikart offers contract clients more than 33 years of experience, a responsive working relationship and the ability to take products from formulation development through full-scale commercial production.

Major Markets

MIKART PROVIDES A WIDE RANGE of services to the pharmaceutical industry, including PhRMA, specialty pharma and biotech.
