Year Founded: 1996

Number of Employees: 85

Annual Worldwide Revenues: <\$10 million

Key Personnel: Steve Vanderboom, Chief Executive Officer; Greg Kupp, Vice President and Chief Operating Officer; Bob Reagan, Vice President, Sales and Marketing; Cynthia Hansen, Director, Quality Assurance.

Who We Are

PACE ANALYTICAL LIFE SCIENCES is a full service contract analytical testing laboratory providing chemistry and microbiology testing services to the pharmaceutical and medical device industries. Services include methods development/validation, raw material testing, stability testing and storage, product

release testing, chemical characterization and residual chemical analysis. Pace Analytical Life Sciences operates two laboratories, one located in Oakdale, MN and the other in San German, Puerto Rico. We are FDA registered, DEA registered and ISO/IEC 17025:2005 accredited.

Major Markets

PACE ANALYTICAL LIFE SCIENCES provides contract analytical testing services to the pharmaceutical and medical device industries. We strive to meet the business needs of our customers for high quality, cost-effective analytical measurements and services. We work for a wide range of companies; from smaller virtual companies up through some of the largest companies in both the pharmaceutical and medical device industries.

Services Offered

PACE ANALYTICAL LIFE SCIENCES provides contract analytical testing services to support the pharmaceutical and medical device industries. With over 50 experienced chemists and microbiologists on staff, we provide the following services:

Analytical Chemistry Services: Method Development & Validation, Stability Testing & Storage, Product Release Testing, Raw Material/Compendia Testing (USP/NF, EP, JP), Extractable/Leachable Testing, Mass Spectroscopy Services (LC/MS, LC/MS/MS, GC/MS, ICP/MS) and Aerosol Testing Services.

Microbiology Services: Sterile Product Testing (Sterility, Bacterial Endotoxins, Particulate analysis, Biological Indicators), Non-Sterile Product Testing (Microbial Limits, Antimicrobial Effectiveness Testing, Bioburden Testing), Product Release Testing, Facility Support, Environmental Monitoring, Water Testing, Organism Identification (Riboprinter and Biolog Capabilities)

Medical Device Services: Combination Product Testing, Device Testing, Physical Testing, Facility Validation Testing, Microbiology Services, ISO 10993-18 (Chemical Characterization) and ISO 10993-7 (Residual Chemical Analysis)
