Who We Are

PFIZER CENTRESOURCE IS A separate division within Pfizer that offers worldwide expertise and capacity in fine chemicals and finished dosage form manufacturing. The Fine Chemicals Business Unit is a recognized industry leader in steroid synthesis and production. The Contract Manufacturing Business Unit offers state-of-the-art facilities that meet or exceed GMP standards for solid oral and sterile dosage forms.

Our fully accredited worldwide manufacturing network is supported with dedicated project teams, an excellent record of regulatory compliance, and a history of innovation and long-term investment in facilities.

Major Markets

ON A WORLDWIDE SCALE, PFIZER CENTRESOURCE can be a start-to-finish outsourced solution for intermediates, APIs, and finished dosage forms. Contact our world headquarters or one of our regional offices to assess your pharmaceutical production needs.

Services Offered

WITH MORE THAN 40 YEARS of steroid expertise, Pfizer CentreSource (PCS) is a world leader in fully integrated steroid manufacturing, providing a broad range of cortico and hormonal steroids that rely on Pfizer's long-standing, proprietary expertise in early-stage bioconversion operations. The company supplies high quality and high value APIs and intermediates derived from its chemical synthesis, custom fermentation, and bioprocessing capabilities. PCS also provides cost effective and high quality solutions in aseptic filling and freeze-dried sterile manufacturing dosage forms.
