Who We Are

PIRAMAL HEALTHCARE (formerly Nicholas Piramal) is a contract development and manufacturing organization of that provides end-to-end support required to bring a drug to market or to manage the life cycle of a launched drug. Our capabilities extend from Clinical Phase API Synthesis, Formulations Development, Scale-up to Commercial API and Finished Dosage form supply. In addition to our FDA/MHRPA approved facilities across North America, UK, and India we are investing heavily in state-of-the-art API &

Formulations development centers. Our global network of assets offers speed for early phase API/Formulations development & scalability and efficiency from Phase III onwards.

Major Markets

WE OFFER UNIQUE PARTNERSHIPS to virtual, small and big pharmaceutical companies in North America and Europe. Our integrated drug development approach and global assets provide local support for early phase projects and the flexibility of

the entire network for late phase projects. Intermediates manufactured in Chennai can be finished into API in Toronto and bulk tablets made in India packaged for release from the UK – all within the same project. Our services help our customers obtain the optimal solutions for their products while reducing issues of supplier complexity.

Services Offered

CUSTOMERS CAN PARTNER WITH US in any of the following distinct activities or leverage our bundle of services provided through our global network of assets.

- Process development, Synthesis and Scale-up of API for early phase studies, and Preformulation Studies
- Formulations development and Clinical Trials Material supply (cold chain capabilities)
- Clinical Trials Material Packaging, Sample Binding & Distribution
- Clinical trials at in-house CROs
- Commercial manufacturing for APIs (includes High Potency)
- Commercial manufacturing of Finished dosage forms (including hormonal products)
- Contract packaging, artwork management, product launch and distribution services
