## Who We Are

TAPEMARK IS A FULL-SERVICE contract manufacturer offering innovative design, manufacturing, and finished packaging for the pharmaceutical, medical, and consumer products industries. We specialize in single-dose products containing your API: pads, topical and transdermal patches, soluble films, Snap!® packaging and more. Our integrated converting capabilities include laminating, coating/dispensing, folding, die-cutting and packaging. Tapemark is cGMP compliant, ISO 9001 and 13485 certified and FDA-audited for Drug and Device. Our 55+ years of converting expertise are complemented by a strong quality system, including compliance for EU and Australia, and a focus on best practices such as DFSS and continuous improvement.

## Major Markets

TAPEMARK SERVES THE PHARMACEUTICAL, medical device, and consumer products markets internationally. One of our dosage delivery formats is Snap! packaging, providing convenient unit-dose delivery for lotions and ointments. Tapemark's family of Snap! products includes Snapplicator™, which adds an applicator for "no-touch" dispensing.

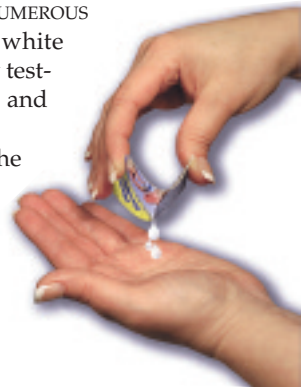

As the industry leader in soluble film converting, Tapemark features SoluStrip™, one or more soluble film strips containing your API individually pouched for maximum protection. Our SoluStrip Pak™ contains multiple doses of film in a convenient, portable package. Several forms of secondary packaging are available to meet pharmacy and/or retail display requirements.

Our long history as a medical device manufacturer makes us an excellent source for products combining an API and device.

## Services Offered

TAPEMARK'S FACILITIES INCLUDE NUMEROUS Class 100,000 clean room and white room suites, and on-site laboratory testing for both incoming materials and finished product release.

We work with you to design the product, source the raw materials, and manufacture and package to meet your needs. Tapemark is your contract manufacturer of choice, blending experience, quality, and innovation to meet your needs.
