Key Personnel: Ge Li, Ph.D, Chairman and Chief Executive Officer; Edward Hu, Chief Operating Officer; Steven Hutchins, Vice President, Business Development.

Who We Are

WUXI APPTec IS A LEADING global pharmaceutical, biotechnology and medical device outsourcing company with operations in China and the U.S. As a research-driven and customer-focused company, WuXi AppTec provides a broad and integrated portfolio of laboratory and manufacturing services throughout the drug and medical device R&D process and beyond. Our services are designed to assist our global customers in shortening the time and lowering the cost of drug and medical device R&D by providing cost-effective and efficient outsourcing solutions.

WuXi AppTec's primary China-based facilities include a 630,000-square-foot R&D center in Shanghai Waigaoqiao Free Trade Zone, a 220,000-square-foot process development and cGMP-quality manufacturing plant in the Jinshan District of Shanghai, and a 130,000-square-foot R&D center in Tianjin that focuses mainly on discovery chemistry services. U.S.-based facilities include a 75,000-square-foot R&D, testing and manufacturing facility in Philadelphia, PA; a 63,000-square-foot R&D, testing and manufacturing facility in St. Paul, MN; and a 46,000-square-foot testing facility in Atlanta, GA.

Major Markets

WUXI APPTec SERVES A BROAD range of leading pharmaceutical, biotechnology and medical device companies worldwide, providing integrated services for both small molecule and biologics across the discovery to commercialization spectrum.

Services Offered

Laboratory Discovery

Synthetic and Medicinal Chemistry • Analytical Chemistry • Discovery Biology • Safety Pharmacology • DMPK and ADMET • Bioanalytical Services

Drug Development and Manufacturing

Process Development • Process Scale Up • cGMP Manufacturing of AI and API • Preformulation and Analytical Development Services • Pharmaceutical and Formulation Development • cGMP Manufacturing of Drug Products

Biologics Testing and Manufacturing Services

Technology Transfer • Cell Line Development and Characterization • cGMP Cell Banking • Process Development and Product Characterization • cGMP Manufacture of Cellular Therapeutics and Cell Expansion • Lot Release and Raw Materials Testing • Viral Clearance Validation • Stability Testing • Custom Assays

Device/Combination Products Testing and Manufacturing

Testing to ensure device is manufactured, packaged, and sterilized in accordance with GMP guidelines • All relevant test modalities used to study biological safety (in vivo and in vitro) • Contract manufacturing for device, combination and tissue products

Toxicology

Clinical Pathology • Toxicokinetics Analysis • Immunogenicity and Immunophenotyping • Histopathology • Local Tolerance • Acute Toxicity • Repeat Exposure • Carcinogenicity • Reproductive Toxicity • Immunotoxicity • Biodistribution • Animal models include mice, rats, rabbits, pigs, dogs and monkeys
